

**DEBEER**  
REFINISH

Experience DeBeer Refinish.

# THE DIFFERENCE IS DEBEER

## PRECISION IN FINISHING

### 1-231 FADE-OUT THINNER

DeBeer Refinish introduces the new 1-231 Fade-Out Thinner liquid. DeBeer is committed to developing its product portfolio to ensure it continues to offer solutions that improve body shop efficiency and process times.

The new Fade-Out Thinner is a welcomed addition that complements the current Fade-Out Thinner Aerosol within the DeBeer assortment.

The new product is simple to use, offering an easy fade-out process. It can be mixed with any DeBeer Clears or 2K Topcoats to create a high-quality finish. It has excellent wetting properties, melts seamlessly into the blended area and creates a smooth transition into the existing finish, making the repair area invisible. It's non-sensitive to sagging and can be applied in multiple layers.

#### How to order

DeBeer Refinish 1-231 Fade-Out Thinner is available now. The information you will need to order this product is summarised to the right.

As part of the 1-231 Fade-Out Thinner liquid introduction, the 47-91 2K Spot Repair Thinner will be rationalised. This product will no longer be available to purchase once stock levels have depleted.

Item no.	1-231
