REFINED ACCELERATION

8-129 HS420 SPEED OPTIMISER

DEBEER
REFINISH

ROBUST RESULTS FOR ACCELERATED DRYING WITH THE VERSATILE SPEED OPTIMISER

DeBeer Refinish has developed a new versatile 8-129 HS420 Speed Optimiser. Carefully formulated to reduce drying times of two of the DeBeer Clears, the 8-129 HS420 Speed Optimiser is a simple solution to driving body shop productivity by improving the drying process.

The new 8-129 HS420 Speed Optimiser is the newest addition to the DeBeer portfolio.

Versatility

Driven by innovation, we created the 8-129 HS420 Speed Optimiser to be compatible with two of our DeBeer Clears, the 8-514 HS420 Speed Clear and 8-714 HS420 Supreme Clear Coat.

Compared to our current offering, the 8-539 HS420 Speed Additive which can only be used with one Clear, the 8-129 HS420 Speed Optimiser is a more versatile product that allows for optimal product usability.

Improved drying

DeBeer is renowned for offering solutions that allow for body shops to work more productively. The 8-129 HS420 Speed Optimiser has been designed to improve the repair process by reducing the drying times of the 8-514 HS420 Speed Clear and 8-714 HS420 Supreme Clear Coat especially in low bake conditions of 40 °C, a quick option to deliver high-quality finishes.

Robust and durable

Choosing DeBeer means choosing a brand you can rely on to deliver outstanding results. Technologies in the 8-129 HS420 Speed Optimiser ensure your repair work is robust and durable, for quality and long-lasting refinish work.
