

THE DIFFERENCE IS DEBEER *PREMIUM PRECISION*

1-350 DEBEER ULTRA VELOCITY PRIMER

DEBEER
REFINISH

DRIVEN BY PERFORMANCE FOR PREMIUM PRECISION

DeBeer Refinish is committed to ensuring that you are equipped to provide premium repairs in a timely manner. Recent progress in UV curing technology has allowed us to create a primer that will revolutionise the way you work.

Driven by performance means that we are committed to providing precision refinishing solutions. Our Ultra Velocity Primer has been developed to increase productivity and accelerate repair cycle times. It can be applied directly to all common automotive substrates and cures in as little as two minutes when used with certain UV lamps*.

Time saving

Everything about our Ultra Velocity Primer has been designed to provide a simpler, yet faster process. With UV-accelerated curing times and the convenient aerosol packaging for faster application, the primer is the perfect product to enhance productivity and improve body shop efficiency.

What is UV Curing?

Ultraviolet (UV) light is one of the latest curing technologies in use in the industry, but how does it work? The primer is specifically formulated to undergo curing when exposed to ultraviolet light. The process accelerates drying times while removing the need for energy-intensive baking or infrared (IR) equipment. Our Ultra Velocity Primer can be cured with the latest **UV-A low-energy LED light technology**, making it an accessible and convenient option for body shops.

How to order

DeBeer Refinish Ultra Velocity Primer is available now. The information you will need to order this product is summarised below.

DeBeer Ultra Velocity Primer	
Item no.	1-350
Article no.	1-350/4
Contents	400 mL
Per box	6

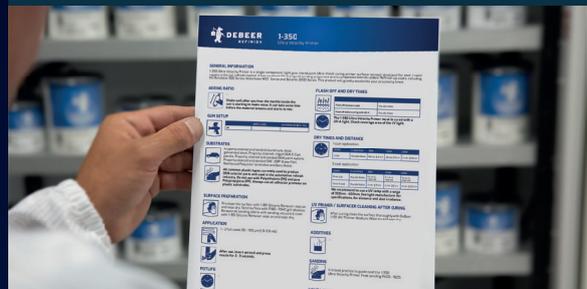

A Bold New Approach

- **Fast-curing technology:** utilising UV allows for curing to be completed in as little as two minutes when used with certain UV lamps*, greatly accelerating your process times.
- **Multi-substrate application:** it can be applied directly to suitably prepared e-coat, steel, galvanized steel, aluminium, and most common automotive plastics, providing you with a versatile and fast primer option.
- **Convenient packaging:** the aerosol canister is quick and easy to use, saving time on gun set-up and cleaning, plus no mixing is required. Wastage from over mixing and unused products is also eliminated.
- **Exceptional properties:** it provides a high quality, smooth finish with excellent filling and sanding properties.
- **Speed and ease:** application is fast and simple increasing body shop productivity.
- **Highly compatible:** compatible with DeBeer Refinish top coats, including the BeroBase 500 Series and WaterBase 900+ Series.

* Refer to TDS for UV lamp specifications.

Premium fast-curing primer developed for professional and precise refinishing. To find out more, please contact your local DeBeer representative.

ULTRA VELOCITY PRIMER APPLICATION PROCESS:

1 Ensure the repair area is prepared according to the TDS.

2 Shake the aerosol canister well before use for at least 2 minutes.

3 Spray 1-2 coats from a distance of 25-30cm.

4 Flash-off 2 minutes between coats, and 3-5 minutes before beginning UV curing.

5 UV cure for 2-5 minutes, depending on film build and UV lamp type – refer to the TDS for UV lamp specifications.

6 Wipe the repair area with solvent wipes to remove all residue.

7 Sand and clean the repair area.

8 Apply the desired DeBeer topcoat and clear as you normally would.
