

THE DIFFERENCE IS DEBEER *SIMPLICITY*

MM5214 METALLIC BRIGHT RED

DEBEER
REFINISH

ENSURE A DEEPER AND MORE SATURATED RED FINISH

DeBeer Refinish makes it easy for you to perfectly colour match and achieve OEM-standard repairs on both simple and complex finishes.

Metallic Bright Red is an enhanced toner that has been introduced to the DeBeer Bero Base 500 Series for even better colour matching abilities for bright red cars with candy effects.

Simple Application

The Metallic Bright Red has a simple application process to achieve a bright end result with great depth and colour accuracy.

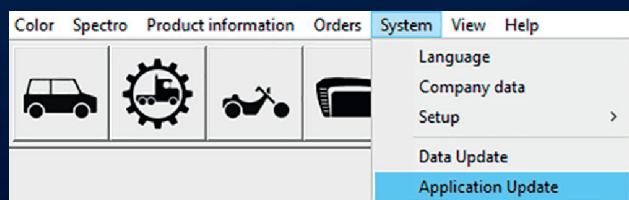

It is a mixing toner that can be used with any toner in our Bero Base Series. It can be used with metallic or xirallc colours in a simple two stage application process, or a three stage process with effect and candy colours to achieve a bright end result to match most OEM red finishes.

The introduction of the MM5214 Metallic Bright Red will result in the rationalisation of the current Metallic Bright Red toner (MM5184).

How to access the Metallic Bright Red

Please ensure that your ICRIS software is up to date. The new colour formulations with the new Metallic Bright Red toner are available on the latest update.

To update your ICRIS software, follow the instruction below.
